

Clonezilla

on Ventoy

Doug Barth, Cochise Linux User Group (CLUG), 17-Dec-2024

Boot into Clonezilla

- Assumption: Clonezilla (live) is “installed” to Ventoy (CD boot works fine also)
- Insert Ventoy flash-drive into system, boot and select Ventoy as boot device
- Step-by-step
 - Clonezilla live (VGA 800x600)
 - English
 - Keep (default keyboard)
 - Start Clonezilla
 - device-img
 - local-dev
 - enter

- Step-by-step (page 2)

- Ctrl-C
- Choose (backup) **destination** drive and partition
- Skip checking
- Choose (backup) directory
- Beginner
- Save disk
- Input a name for the image
- Choose the **source** drives and partitions
- Choose defaults for - Z9p, - sfsck, - scs, - senc, - p choose
- Enter

- Step-by-step (page 3)
 - Continue y/n
 - =====> Let er rip! <=====
 - =====> Finished! <=====
 - Enter
 - Reboot (or power off)
 - Please remove the live-medium...
- Check your backup image after reboot
- Copy off the system if possible
